DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12, 16, 19, 21, 30 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Hyun et al. (4,983,546) and the following comments.

Hyun et al. disclose providing a substrate (3) with non-planar surface having an insulating layer (4) deposited thereover having non-planar upper surface; providing a UV light source; exposing said substrate to UV light from said UV light source; and maintaining said UV light at conditions sufficient to reflow said insulating layer to produce a planar portion of the insulating layer upper surface (Col. 5, lines 25-47); further comprising performing said depositing step in a first processing chamber and said exposing step in a second processing chamber; wherein the substrate non-planar upper surface comprises at least one trench (3A) and wherein the reflow operates to fill the trench with the insulating layer.

Choice of a particular energy level of the UV light, duration of the UV light and temperature during exposure step would have been a matter of routine optimization. See MPEP 2144.05.

Allowable Subject Matter

Claims 1-7 and 9-11 are allowed.

Claims 13-15, 17, 18, 20 and 32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
